

BIS Licensing of 600-series and 9x515 Items October 15, 2013 to December 31, 2020

Since October 15, 2013, certain items that were determined not to warrant control on the United States Munitions List (USML) have moved to the Commerce Control List (CCL), creating 600-series ECCNs and 9x515 ECCNs.

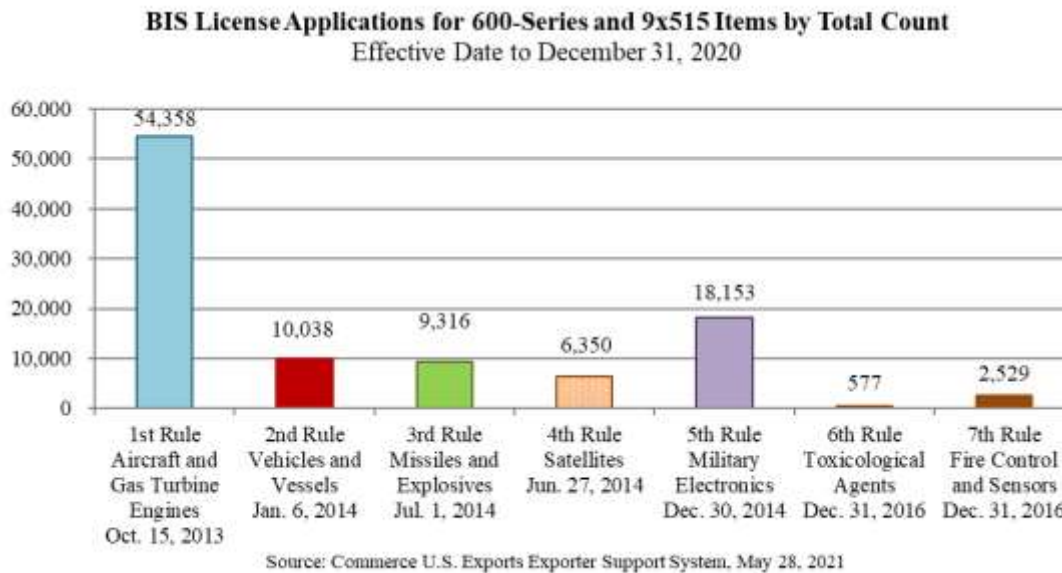

From October 15, 2013 to December 31, 2020, BIS has processed a total of 97,455¹ applications for 600-series and 9x515 items. Of these, 91,105 applications were for 600-series items and 6,350 were for 9x515 items.

Of 91,105 applications for 600-series items:

- Approved applications were 81,951, 90.0% of the total;
- Returned without action (RWA) were 8,896, 9.8% of the total; and
- Denied applications were 258, 0.3% of the total.

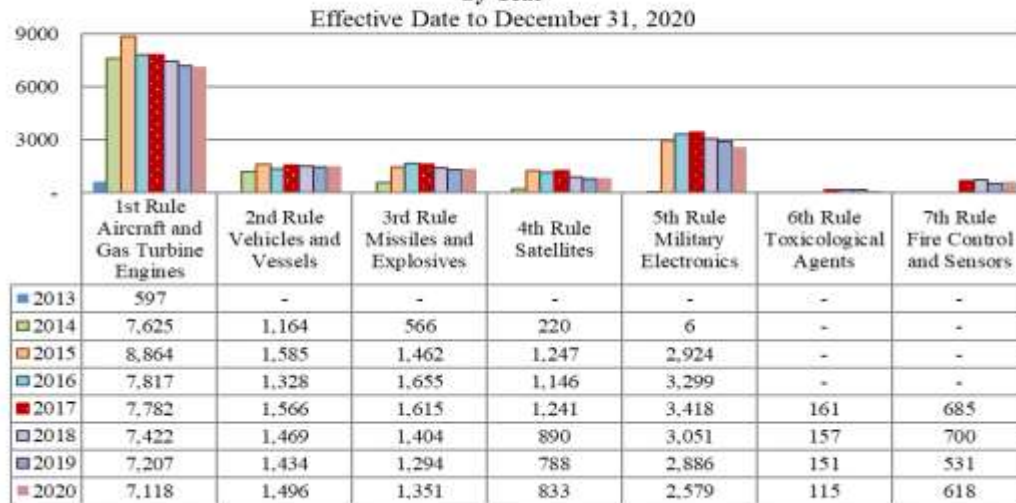

Of 6,350 applications for 9x515 items:

- Approved applications were 5,369, 84.6% of the total;
- Returned without action (RWA) were 876, 13.8% of the total; and
- Denied applications were 105, 1.7% of the total.

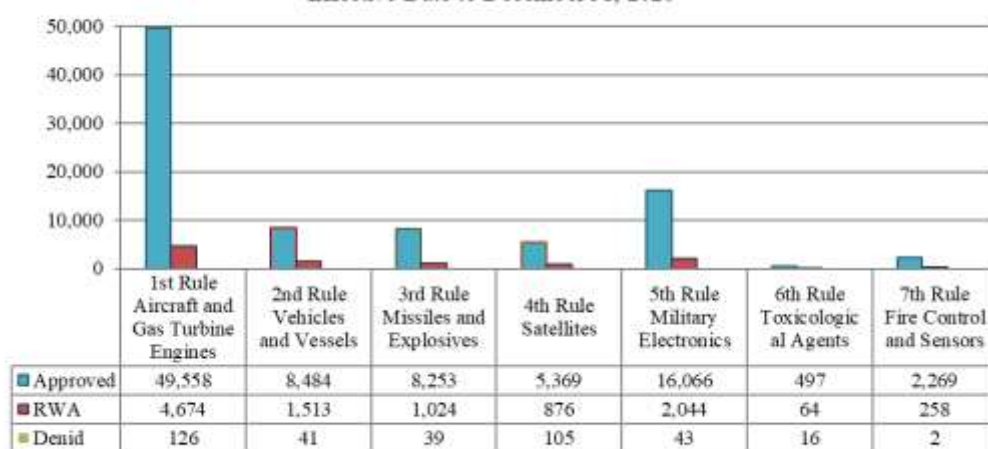

¹ Note: This number for the total applications is slightly smaller than the sum of all applications by each rule because license applications containing multiple ECCNs may be associated with more than one regulatory change. For instance, a single application containing 9A610 and 0A606 items would be counted in both the 1st rule column and the 2nd rule column.
